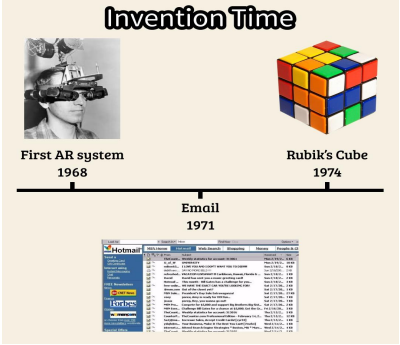
Strategy: Increase the exposure through **incentive** (i.e. free giveaways of our products)

- Boost overall brand awareness asking people to tag 3 friends on the post and increasing follower counts
- Drive engagement by allowing people share their own experience
- Put the spotlight on our new product which could help generate more leads and boost sales

Post # 2



又AR又VR，到底咩黎嫁？其實 VR就係虛擬實境（Virtual Reality），帶你入去一個虛擬既世界。而 AR就係增強實境（Augmented Reality），將連接真實同虛擬既世界，平時大家挽開既 Pokémon Go就係啦。如果大家都想體驗下 AR既魅力，但又miss左我地雙十一既尾班車，禁就拿拿臨 DM我地拿Promo Code，帶我地既 產品番屋企啦！
AR and VR, what are they? In fact, VR stands for Virtual Reality, which takes you into a virtual world. And AR stands for Augmented Reality, which connects reality with the virtual world. Just like Pokémon Go. If you all want to experience the charm of AR, but miss our 11.11 discount, here is the chance! DM us for the Promo Code, bring our products to your home!

Strategy: Talk about trending topics

- Link AR which seems distanced with what audiences are **familiar with and interested in** (i.e. Pokemon Go)
  - It may bring **explosive traffic** in the short-term
- Interact with colde audience by providing **informative contents** (i.e. facts about AR) so that they know what we are selling and focusing
- **Trigger actions** (i.e. Direct Messenger us) **using incentives** (i.e. Promo code), increasing the level of engagement and converting to purchasement
  - Identified potential customers: Good for **future targeted marketing**
- **Keyword targeting**: Add more related hashtags to get exposed to potential audience

Strategy: Increase the exposure through an interesting way

- Direct promotion for AR Archer
- Humor as reachout and engagement
- Put the spotlight on our new product which is safer and could replace the real archer

Story Series #4 & #5

Strategy: Increase Interactivity and know followers' preference

- Asking questions about the favourite toys of followers during their childhood, could help understand which types of toys they are really interesting in
- Voting on choosing traditional toys or toys with AR could also help us understand whether how people are willing to buy AR-related toys
